White scratch - build Slot Car Kits - 1:32 Scale

www.slotwagenracing.com

"Actual products may differ slightly from the renderings presented."

A Special Thank You to the Slotboyz SA Group of Racers We would like to express our sincere appreciation to the Slotboyz SA Group of Racers, the very first club to support us by participating in the testing of our first-generation kits.

Your honest feedback, constructive criticism, encouragement, and valuable guidance motivated us to continue improving every aspect of our products.

Your experience and willingness to help played an important role in developing our early kits into the high-quality scratch-build kits they are today.

Thank you for believing in us, supporting our journey, and helping us grow. Your contribution will always remain an important part of the Slotwagen story.

This brochure is proudly dedicated to each and every member of the Slotboyz SA Group of Racers.

SlotWagen – Let's Build. Let's Race.

Slotwagen designs and manufactures high-quality resin slot car bodies, carbon-fibre-infused PETG chassis, and specialised components for slot car enthusiasts and hobbyists.

We continuously expand our range, with the goal of releasing five new models every month and giving builders access to unique, non-commercialised cars that are rarely available elsewhere.

Our kits are suitable for hobbyists who enjoy creating beautifully detailed display models, often known as “shelf queens,” while also being engineered for racers who want competitive cars for club events and tournaments. Each kit includes quality components from well-known suppliers and is produced to a high standard.

Slotwagen White Kits are not designed simply to be assembled; they require a few basic tools, patience, skill, and creativity to customise, modify, tune, and develop each model to its full performance potential. The result is a truly personal, custom-built slot car that reflects the builder's own craftsmanship and racing style.
